## MEASURING INSTRUCTIONS

Be sure to measure your body. Do not measure over shirts or slacks.

### Shirts

- NECK measurement is the circumference of the neck as illustrated.
- SLEEVE LENGTH is measured by placing one end of the tape at the bottom of the collar at the center of the back and marking the distance around the elbow to the bottom of the wrist. It is often helpful to have the arm slightly bent.
- CHEST is taken at the fullest point of the chest/bust, keeping tape under arms and around shoulder blades. Hold tape level and firmly but not tight.

### Pants

- WAIST is measured around your natural waistline, keeping one finger between the tape and the waist. For men, as a general rule, the number of inches measured will equal your size, when measured correctly.
- INSEAM is measured in standing position, measure from the center crotch to bottom of ankle bone. It is easier to have someone else measure you than to do it yourself. You can also take your current pair of pants and lay them flat on a table and measure the inside seam from the crotch to the bottom of the pant.
- HIP measurement is taken in standing position, measure around the fullest point of hips.

### Outerwear

- CHEST SIZE is taken at the fullest point of the chest, keeping tape under arms and around shoulder blades. This measurement should be taken over clothing, preferably over garments or types of garments to be worn with the jacket.
- SLEEVE LENGTH is measured by placing one end of the tape at the bottom of the collar at the center of the back and marking the distance around the elbow to the outer edge of the wrist.
